

NESTLE Surveyor's Rod Accessories Mini Bipod

For efficient marking of measuring points

Product number :14960000

Topfeatures

- Clamping screw for prism and antenna poles with 22 mm - 32 mm
- Fast and flexible assembly
- Particularly suitable for carbon rods due to rounded clamps
- Rubberised leg ends - no scratching or slipping of sensitive surfaces such as glass

All special features at a glance

- When marking out measuring points, the GPS/antenna or prism pole often has to be put down. But where to put it on construction sites or on damp and muddy ground? The robust and lightweight mini bipod brace is ideal for safely setting down your pole.
- Protects the prism, antenna and field computer against dirt and damage on difficult surfaces.
- The mini two-legged brace also gives your antenna pole a secure stand when leaning against a wall.
- The mini bipod brace is very light, easy and flexible to mount.

Description

With the NESTLE mini bipod brace, you can easily and safely put your GPS/antenna - or prism pole to one side, even in rough everyday use, without damaging or soiling the attached prism, antenna or field computer. This makes you much more flexible and efficient when marking measurement points.
