

LEICA target plate GZM3

Improve laser reflection

Product number :22022000

Topfeatures

- Handy and small - fits in the Leica DISTO Holster
- Ideal for targeting floor markings
- For tracking alignments and angles with the line laser

All special features at a glance

- In combination with a DISTO, speeds up the measuring process of corners, curves or flat surfaces from any position

Description

Target plates for laser rangefinders improve the reflection of the laser steel. By using target plates, you improve the range when measuring with your laser rangefinder even in difficult weather and light conditions. Inaccurate edge measurements are a thing of the past.
