

NESTLE Ranging Pole RP-Herb, 1,3 m with clamp for target board

PVC-coated alignment stick "Made in Germany" with clamping piece for target board

Product number :14211000

Topfeatures

- Positioning the target board during scanning work
- Robust, PVC-coated wooden pole
- Anti-twist clamping unit

All special features at a glance

- All ranging poles are MADE IN GERMANY
- The alignment rod has a sturdy steel tip, because this is where robustness is particularly important
- Use of best wood (Ø 32 mm) in production

Description

The NESTLE RP-Herb wooden rod is a PVC-coated, robust alignment rod made of wood. The rod has a clamping unit at the top with a screw to hold a target plate, as used in work with laser scanners. The clamping unit has a notch for exact, centered positioning of a target plate. The target plate is fixed in the clamping unit with a screw.
