

NESTLE wooden snow pole, 200 cm, black/yellow, 12 pieces in a set

Proven in the Black Forest

Product number :11301000

Topfeatures

- Yellow/black is visible from afar.

All special features at a glance

- Safe marking of the road course in high snow cover.

Description

NESTLE snow poles made of the best Black Forest wood are ideal for marking the course of roads with high snow cover. Clearing services can use the black and yellow guide poles, which are easily recognisable in winter, to orientate themselves. The black and yellow 50 cm graduation makes the snow guide poles easy to recognise even from a long distance. The rounded tip of the tube makes it quick and easy to set up the poles, even in deep snow. With PVC coating.
