

NESTLE prism pole PA-3-D with pressure clamping, 130-215 cm

Simple operation - perfect results!

Product number :14014000

Topfeatures

- Pin/pin for Leica/wild prisms pre-mounted.

All special features at a glance

- Prism pole for surveying of all kinds in the building sector and cadastre.
- Simplest operation: set the right height with one hand, clamp with the other hand using the push-button. Our prism poles also play a pioneering role in terms of robustness:
- Outer and inner pipe are anodised and insensitive to weathering.
- The graduation is indestructibly applied by a special laser printing process.
- Stainless steel tip.
- Pin/pin for Leica /Wild prisms pre-mounted.

Description

The NESTLE prism pole PA-3-D is characterised by its specially hardened tip, which wears down by 95 %, and the extremely durable aluminium and stainless steel combination. Its robust pressure clamping for the extension tube, shock absorption and permanent pitch make it universally applicable. Can be used for all common prism systems with the Wild/Leica connection.

Technical Details

Adapter	Wild/Leica pin included
Weight	800 g
Clamping	Pressure clamping
Length	130 - 215 cm

Scope of supply

NESTLE prism pole (PA-3-D)
