

NESTLE ranging pole support Mini, light version with clamping bracket

Secure stand for midi prism poles

Product number :11900000

Topfeatures

- Secure stand for midi prism poles near the floor.

All special features at a glance

- Not only suitable for setting up short ranging poles (1m) on hard ground, but especially for positioning midi prism poles.
- Available with clamping bracket or clamping screw.
- Simple operation: fix the midi prism or short ranging pole over the measuring point and bring it to a plumb line.
- Painted orange to protect against corrosion.
- The thin metal base can be pressed into the ground if necessary, for a secure stand. Ideal for our MIDI prism poles, in order to be able to position the prism securely and plumb above the measuring point even when space is limited (under roofs, with dense vegetation).

Description

The Mini ranging pole support with clamp and ball joint head is particularly suitable for surveying in the building and cadastral sector. Not only for setting up half alignment rods (1 m) on hard ground, but especially for positioning midi prism rods.
