

NESTLE Telescopic Tripod, aluminium, light version, 5/8 inch 77-190cm

For the longest and toughest use

Product number :13001000

Topfeatures

- Lightweight and easy to transport
- Outstanding ease of use
- Best quality in workmanship and material, thus suitable for many years of the hardest use

All special features at a glance

- The tripod has a 5/8 connection and comes with a 1/4 adapter.
- With the patented circumferential clamping band, the clamping acts on both the outer tubes and the centre profile. This ensures a constant clamping force in every extension position of the stand.
- We use only high-quality aluminium for our tubes and centre profiles. The aluminium parts are anodised and therefore extremely weatherproof.
- The plastic parts are made of glass-fibre reinforced polyamide and are therefore extremely robust. This makes the tripods stand out clearly from the competition in terms of usability.
- Extremely user-friendly operation

Description

The NESTLE telescopic tripod is ideal for positioning lightweight laser equipment or laser distance meters, also in conjunction with the NESTLE Pythagoras adapter. The tripod has a 5/8"- connection and is delivered incl. 1/4"-adapter. For use, the tripod is simply set up and can be pre-horizontated by means of the bubble level in the head. The telescope segment can be continuously extended and fixed at the desired height with a clamping screw. The high quality of our tripods ensures many years of use under the toughest conditions.
