

NESTLE Measuring wheel Model MR-21

Measuring wheel MR-21 with foldable aluminium guide rod and spoke wheel

Product number :12003001

Topfeatures

- Spoked wheel
- Precision model
- Foldable aluminium guide rod
- Counter also counts backwards, subtractions are possible
- Made in Germany

All special features at a glance

- Quality counter MADE IN GERMANY mounted above the measuring wheel, easy to read from a standing position
- Counter also counts backwards, subtractions are possible
- Zeroing lever directly next to the counter enables a quick reset
- Running rubber is ground to exactly 318.5 mm diameter
- The frames of our measuring wheels are robot-welded and thus guarantee consistent quality and extreme robustness for years to come

Description

Measuring wheels are used for measuring distances on level ground. The wheel is rolled along the measuring distance while being held forward by a guide rod. The distance travelled is displayed by means of a counter. Typical areas of application are: official use, road and track construction, agriculture and forestry, landscaping and everywhere where distance measurements over medium to long distances are required. The NESTLE MR-21 measuring wheel is equipped with a foldable aluminium guide rod and a spoke wheel. The quality counter records distances in the direction of travel and subtracts against the direction of travel. This measuring wheel MR-21 also offers a parking bracket and an integrated brake. NESTLE measuring wheels are always "Made in Germany".

Technical Details

Colour	Luminous paint red
Weight	2950 g
Wheel	Spoked wheel
Wheel diameter	318.5 mm
Measuring range	9999.99 m / cm reading
Wheel circumference	1 m
Tolerance	< 0,02 %

Scope of supply

Measuring wheel MR-21 including carrying bag with logo
