

## NESTLE measuring wheel, standard model, solid wheel

### Simple distance measurements over long distances

Product number :12002001

#### Topfeatures

- Quality counter MADE IN GERMANY easy to read from a standing position.
- Counter also counts backwards, subtractions are possible.
- Zeroing lever directly next to the counter enables a quick reset.
- Integrated brake.
- Foldable guide rod.
- As a quality certificate, you will receive a test sticker on each measuring wheel indicating the tolerance of the wheel.

#### All special features at a glance

- For official use, a version with official declaration of conformity is optionally available (formerly known as calibration).
- As a certificate of quality, a sticker on the wheel indicates the deviation from the correct circumference.
- Stable and generous storage bar, easy to fold out to the rear.
- Sturdy solid disc wheel keeps the measuring wheel securely on track and ensures maximum running smoothness.
- The rubber is ground to exactly 318.5 mm diameter.
- The wheel's framework is robot-welded and guarantees for lasting quality and durability.
- Available in solid or spoke wheel design.

#### Description

Measuring wheels are used for measuring distances on level ground. The wheel is rolled along the measuring distance while being held forward by a guide rod. The distance travelled is displayed by means of a counter. Typical applications are: official use, road and track construction, agriculture and forestry, landscaping and everywhere where distance measurements over medium to long distances are required. Choose measuring wheels with a solid wheel with a slightly higher weight for accurate tracking. The quality counter records distances in the direction of travel and subtracts against the direction of travel. This measuring wheel is equipped with a parking bracket, integrated brake as well as a foldable guide rod. NESTLE measuring wheels are always "Made in Germany".

#### Technical Details

Colour	Construction warning colour orange
Weight	3900 g
Wheel	Full wheel
Wheel diameter	318.5 mm
Measuring range	9999.99 m / cm reading
Wheel circumference	1 m
Tolerance	< 0,05 %
Additionally for official use (Declaration of Conformity)	Item no. 70100120

## **Scope of supply**

NESTLÉ measuring wheel, solid wheel version
