- Simple operation.
- Reading of the laser beam display possible on the front as well as on the rear side
- Acoustic sound signal and LED display indicate in which direction the laser beam must be moved.
- Sound signal can be switched off.

Description

The NESTLE DECTO laser receiver is suitable for all pulsating line lasers with red laser light. Thanks to the integrated bubble level, the receiver can be aligned quickly and precisely. An acoustic sound signal and the LED display indicate in which direction the receiver must be moved. The sound signal is optional and can be switched off. The receiver is best suited for indoor use, but can also be ideally used outdoors.
