

NESTLE GNSS 2-segment carbon pole with foot scale

Low weight - comfortable handling!

Product number :14017000

Topfeatures

- With additional top segments, the pole can be extended by 1 m at a time if required.
- Amazingly light weight less effort is required.
- The carbide tip does not wear out - thus no falsification of the measurement result due to blunt tips.

All special features at a glance

- For GNSS measurements of all kinds.
- The two-piece GNSS pole is ideal for surveying tasks where numerous measurements need to be taken.
- For plumb positioning, the lower part of the rod is equipped with a circular bubble.
- The aluminium tip contains a pressed-in pin made of indestructible tungsten carbide, which shows no signs of wear even after prolonged use under the toughest conditions.
- The carbon ensures comfortable handling even in cold temperatures.
- The two segments of the pole can be transported in a space-saving way in the bag included in the delivery.

Description

The required accuracy in data acquisition presupposes the use of a professional pole. The carbon poles from NESTLE impress with their low weight, durability and convenient handling. The PP-2-F consists of two divisible segments and an engraved foot scale.
