

NESTLE telescopic meter TELEFIX 5 PLUS with folding hook

Telescopic meter for ergonomic reading of clearance heights and load heights

Product number :18409001

Topfeatures

- Reinforced telescopic elements, therefore suitable for use with hooks.
- High flexibility enclosed 70 cm hook.
- Hooks foldable.
- Pressure spring latching on both sides prevents the parts from collapsing.
- Precise handling due to integrated horizontal and vertical bubble.
- Best for determining load heights.

All special features at a glance

- Easy analogue reading of the mm graduation at a comfortable height, without bending down and shaking the telescopic metre.
- Telescopically extendable
- Precise handling due to integrated horizontal and vertical bubble level
- Tolerance according to MID guidelines
- Anodised aluminium rectangular tubes give great stability
- Pressure spring latching on both sides prevents the parts from slumping together
- All models include protective canvas bag
- With folding hooks ideally suited for load height averaging

Description

The telescopic meter TELEFIX from Nestle can be extended telescopically up to a height of 5 m and is suitable for measuring roof heights, ceiling heights and gaps. The integrated horizontal and vertical bubble ensures exact handling. The TELEFIX allows easy analogue reading of the mm graduation at a comfortable height without bending or shaking the telescopic metre.
