

NESTLE Bipod Universal

Bipod brace with push button clamp

Product number :14950000

Topfeatures

- For rods up to 35 mm tube diameter.

All special features at a glance

- Use a bipod brace to precisely set up and align all prism and antenna poles. For precise measurements, even in rough terrain.
- The legs can be continuously adjusted in length to the terrain by means of the press studs.
- The rounded claws of the clamp are optimally suited for carbon poles due to the best pressure distribution on the pole.
- For rods from 20 mm to 32 mm tube diameter
- Professional version Made in Germany

Description

Ideal for supporting the pole setup or as an aid when aligning prism poles and antenna poles. The push-button clamping allows the leg length to be changed very quickly, steplessly and precisely. Suitable for all tube diameters from 20 - 35 mm. Made of impact-resistant aluminium.
