

GeoMax MD360 Remote Display

For the best possible control of workflows

Product number :27601000

Topfeatures

- The remote display shows all nine channels of the receiver as well as the vertical indicator arrows.

All special features at a glance

- All settings can be made via the cab display without having to leave the cab.
- Attaches to the windscreen with an extra-strong suction cup.

Description

The MD360 cab display receives and displays the signals sent by radio from the machine receiver directly in the driver's cab. This is particularly helpful when there is no view of the machine receiver. Cumbersome cable connections are no longer necessary.
