Product number :27405000

Topfeatures

- Operation temperature -10°C to +50°C.
- Suitable for all Zone rotating lasers.
- Audible and graphic display.

All special features at a glance

- Double-sided display with graphics and sound signal.
- Two precision levels can be selected.

Description

The GeoMax Zone series includes a total of four laser receivers that complement and enhance the performance of the Zone rotating lasers. The ZRB90 is the entry-level receiver in the Zone series and offers a robust housing as well as a double-sided display with graphics and sound signal. The 1 mm / 2 mm accuracy makes it easy to locate the laser beam and works smoothly up to 300 m. The power supply works via standard AA alkaline batteries.
