- Determination of the height difference between several points.
- Optical distance measurement by means of two distance lines
- Stake out the height of a point
- Very good appearance with above-average workmanship.
- Housing base made of aluminium, cover and rotary knobs made of plastic

Description

The levels of the NLS premium series are predestined for construction and engineering. The high-precision, magnetically damped compensator, the robust all-metal construction and the bright optics make the NLS an absolute professional tool. The HZ circle is smoothly adjustable, the fine lateral movement works endlessly and can be conveniently operated from both sides.
