- Determination of indirect heights and widths
- With BLUETOOTH® Smart Interface
- The Leica DISTO X3 and X4 can be quickly and easily connected to an app for transferring and documenting measurements.
- With the optional DST 360 package, you can precisely target points as well as measure distances between any 2 points.
- Together with the optional Leica DST 360 adapter, the X-Series can be turned into a powerful 3D shooting station.

Description

The robust laser distance meter Leica DISTO X3 with IP65 protection is specially designed for tough and harsh conditions in the field. With the optional Leica DST360 adapter, the X-series can be turned into a powerful 3D recording station! You can also use this adapter to measure distances and height differences between any two points. With the free Leica DISTO sketch app you can easily and quickly transfer your measurements to tablets or smartphones.

Technical Details

App for	iOS / Android
Battery	2 x AA
