

GEOMAX ZAL124 Automatic level set consisting of: Level, tripod + batten

Automatic levelling set for daily use

Product number :27013000

Topfeatures

- Robust and precise for your daily tasks in the construction sector.
- Housing sealed according to protection class IP54 and thus splash-proof.
- Ergonomic two-sided endless fine drive.

All special features at a glance

- The levelling instruments of the ZAL100 series are suitable for simple height transfers on all indoor and outdoor construction sites.
- With graduated circle for horizontal angle measurements.
- With distance threads for optical distance measurements and simple terrain surveys.
- Staking out heights.
- Automatic compensation by air-damped compensator.
- ZAL124 with 24x magnification, art. no. 27001000

Description

The levelling instrument is used in civil engineering to create horizontal surfaces, to set height differences or to set up machines and structures. Levels replace spirit levels where their accuracy is no longer sufficient or their use would be too costly. The ZAL100 line impresses with an outstanding price-performance ratio and includes reliable, or long-lasting devices. Their robust construction and precise optics recommend them for everyday tasks in the construction sector. This practical levelling set includes a 5 m telescopic levelling staff in addition to a high-quality aluminium tripod. With this set, you can get started immediately.

Technical Details

Distance threads	yes
Accuracy 1 km Doubleiv.	ZAL124: 2.0 mm
Weight	1500 g
Compensator	air-damped
Shortest target distance	< 1 m
Dragonfly	8 / 2 / mm
Multiplication/addition con.	100 / 0
Inclination range	±15
Protection class	IP54
Field of view	< 2.1 at 100 m
Pitch circle / division	360 / 1 ° / °

Enlargement

ZAL124: 24 x

Scope of supply

GEOMAX ZAL124, Telescopic levelling staff, Aluminium tripod
