

## GeoMax EZiTEX t100 signal transmitter

### For improved location of supply lines

Product number :27503000

### Topfeatures

- For easy and accurate tracking or location of underground cables or pipes.

### All special features at a glance

- For use before excavation work.
- Enables clear audible and visual controls.
- Compact, robust and easy to use.

### Description

The EZiTEX t100 signal transmitter is used to improve the location of pipes that do not emit a reliable signal. When used in conjunction with EZiCAT pipe locating systems, it allows easy location and accurate tracking of underground cables and pipes. The transducer fundamentally improves performance and allows for improved indications in areas of high signal overlap, accurate depth determination and detection over longer distances through coded signal strength.

### Technical Details

Dimensions	105 mm (H) x 190 mm (D) x 235 mm (W)
Batteries	4 x D alkali
Direct connection (300 Ohm)	Up to max. 1 W
Frequency/Mode	8 kHz, 33 kHz and combined 8/33 kHz
Weight	2,5 kg
Induction (max.)	Up to max. 1 W
Power	4 levels
Protection class	IP67

### Scope of supply

GeoMax EZiTEX t100 signal transmitter, Batteries, Manual
