

NESTLE tubular steel snow pole, 150 cm, yellow/black, 12 pieces in a set

Proven in the Black Forest

Product number :11303000

Topfeatures

- Yellow/black is visible from afar.

All special features at a glance

- Safe marking of the road course in high snow cover.

Description

The robust steel snow poles are ideal for marking the course of the road when the snow cover is high. Clearing services can use the yellow and black guide poles, which are very easy to recognise in winter, for orientation. Due to the yellow-black 50 cm division, the snow guide poles can be easily recognised even from a long distance. The rounded tip of the tube makes it quick and easy to set up the poles, even in deep snow. With PVC coating.
