

LEICA target plate GZM27, for rangefinder, pluggable

Improve laser reflection

Product number :22004000

All special features at a glance

- Despite the Power Range Technology, there are limits to the range of the Leica DISTOs depending on weather and light conditions. That is why there are target plates to improve the reflection of the laser beam.

Description

Target plates for laser rangefinders improve the reflection of the laser steel. By using target plates, you extend the range when measuring with your laser rangefinder even in difficult weather and light conditions. The GZM27 target plate is supplied with adhesive.
