

NESTLE Forestry caliper Fuchs 46 cm

Efficient work - with the double function of the Specht measuring clamp

Product number :20400001

Topfeatures

- The clip can be worn comfortably on the belt.
- The technical features guarantee comfortable handling even under difficult conditions.
- The measuring clamp is extremely robust and resistant for many years of hard use.

All special features at a glance

- Perfect sorting doll.
- For determining tree diameters.
- The caliper of the sorting clamp slides over the measuring rail without jamming, showing exact measuring results.
- The anodised layer prevents abrasion of the numbers and makes the sorting clog insensitive to wind and weather.
- The deep black numerals under the titanium-coloured anodised coating are easy to read even in twilight.
- The measuring clamp has a flat profile 20 x 5 mm and thus a weight of only 400 g.
- The special alloy guarantees a high bending strength of the flat profile.
- Push handle made of impact-resistant polyamide.

Description

The Fuchs measuring clamp is perfect as a sorting clamp for timbers. When opened to the maximum, it is suitable for timbers with a diameter of at least 46 cm. The practical and robust design with 25 x 5 mm flat profile, where the caliper slides over the measuring rail without jamming, proves the high-quality coating. The special laser-engraved printing process makes the numbers easy to read even in twilight, and an anodised coating reliably prevents abrasion. At the same time, this ensures easy cleaning of resins and dirt. The special alloy makes the dial extremely rigid, robust and resistant. Available as standard and "calibrated" version.

Technical Details

Weight	400 g
Length	46 cm

Scope of supply

Forestry caliper
