

NESTLE wooden snow pole, 250 cm, yellow/black, 12 pieces in a set

Proven in the Black Forest

Product number :11302000

Topfeatures

- Yellow/black is visible from afar.

All special features at a glance

- Safe marking of the road course in high snow cover.

Description

NESTLE snow poles made of the best Black Forest wood are ideal for marking the course of roads with high snow cover. Snow clearing services can use the yellow-black guide poles, which are very easy to recognise in winter, for orientation. Due to the yellow-black 50 cm division, the snow guiding poles can be recognised even from a long distance. The round tip of the tube makes it easy to set up the poles in deep snow cover.
