

## NESTLE wooden ranging pole, round three-lug tip, length 2.16 m, luminous red, r/w w/r 12 pieces in a set (from no. 11005000)

**Practical set of 12 with colour gradient: 6 pieces red/white, 6 pieces white/red**

Product number :11005200

### Topfeatures

- Robust and durable PVC sheathing for daily use on the construction site or in surveying.

### All special features at a glance

- Luminous red alignment rods are particularly advantageous in field surveys, as they are more visible.
- All ranging poles are MADE IN GERMANY
- The ranging poles have a sturdy steel tip, because robustness is particularly important there
- Use of best wood (Ø 28 mm) in production
- Round tip for working on grass, forest floor, sand
- Three-lug tip for extra stability

### Description

Ranging poles are used to mark and signal terrain or boundary points during construction and surveying work. In addition, ranging poles help to align or align in the straight line between two poles with a third ranging pole. The two-colour paint makes the alignment rods easily recognisable even from a distance. The colour fields are 50 cm long. Depending on the upper colouring, a distinction is made between white and red heads. In order to make it easier to align, ranging poles are often placed in rows with alternating heads. Sturdy steel tips are used for robust work on hard ground. Only the best wood (Ø 28 mm) is used for this ranging pole. NESTLE wooden ranging poles are PVC-coated for a long service life. All Nestle alignment rods are Made in Germany.

### Technical Details

Colour	Bright red
Gradient	6 pieces red/white, 6 pieces white/red
Length	2.16 m
Material	Wood
Lace	Three-lug tip, round

### Scope of supply

VE=12 pieces, from no. 11005000, 6 ranging poles with colour gradient red/white, 6 ranging poles with colour gradient white/red
