

NESTLE marking gauge stick 100 cm, wood, with one-sided ripper

Cutting to length made easy!

Product number :20502000

Topfeatures

- On cold days, marking meters made of wood are more pleasant to the touch.

All special features at a glance

- Lightweight design.
- Simple tool for scribing logs.
- The tips are exactly one metre apart.
- Version 20502000 with one-sided ripper is ideal for scribing logs.
- The tips and the scribe are made of specially heat-treated tempering steel and are thus protected against rapid dulling.
- As the wooden core is completely plastic-coated, no moisture can penetrate the wood.

Description

Simple but very robust marking gauge stick with a ripper on one side for marking logs. The profile can withstand even higher loads. The two extra-sturdy, galvanised steel hooks are exactly one metre apart, making it almost indestructible. Working with the wooden scribe feels more comfortable, and the wooden version is also lighter than models made of metal.
