

## GeoMax MR360RE Machine receiver set magnet

### Set of machine receiver and remote display MD360

Product number :27604000

#### Topfeatures

- 360° detection window for complete coverage.
- Remote display in the driver's cab to ensure the best possible control of work processes (optional).
- No cables required.
- Particularly strong magnets.

#### All special features at a glance

- The GeoMax MR360 receiver provides accurate terrain height/soil depth information for all visual machine control applications.
- The MD360 remote display unit included in the set enables wireless transmission of the display to the machine cab.
- Large 360° detection windows ensure the detection of every rotating laser beam, from every angle.
- Built-in vertical indicator is used to monitor the dipper arm angle and shows whether it is plumb or under- or over-extended.
- The magnetic holder allows quick attachment and easy change from machine to machine.

#### Description

Practical set consisting of GEOMAX MR360RE machine receiver and MD360 remote display. The MR360 machine receiver provides accurate slope information for all visual machine control applications. This is made possible by large 360° detection windows that can capture the beams of rotating lasers from any angle. The integrated vertical indicator monitors the angle of the pole and indicates whether it is plumb or under or over extended. The remote display shows directional arrows for precise boom alignment. The receiver is easy to set up and can be quickly switched between machines thanks to the magnetic mount. The MD360 cab display receives and displays the signals sent by radio from the machine receiver directly in the cab. This is particularly helpful when there is no view of the machine receiver. Cumbersome cable connections are no longer necessary.

#### Technical Details

Battery power	30 h
Reception area	25 cm
Receiving angle	360°
Accuracy Fine	6 mm
Accuracy Coarse	12 mm
Weight	1800 g
Dimensions	375 x 75 x 107 mm
Reach	200 m
Protection class	IP67
Power supply	NiMh batteries rechargeable

Vertical display

 $\pm 5^\circ$ **Scope of supply**

GeoMax MR360RE Machine Receiver, GeoMax Remote Display MD360, Magnetic attachment, Suitcase, Rechargeable batteries, Charger
