

NESTLE prism pole PA-1-D with pressure clamp, 130-215 cm

Simple operation - perfect results!

Product number :14005000

Topfeatures

- High flexibility due to optional adapters for any common prism.

All special features at a glance

- Prism pole for surveying of all kinds in the building sector and cadastre.
- Simplest operation: Set the right height with one hand, clamp the push-button with the other.
- Outer and inner pipe are anodised and insensitive to weathering.
- The graduation is indestructibly applied using a special laser printing process.
- Stainless steel tip.
- An adapter is included in the scope of delivery. Please specify the prism type when ordering.

Description

The NESTLE prism pole PA-1-D is characterised by its specially hardened tip, which wears out 95 % less, and the extremely durable aluminium and stainless steel combination. Its robust pressure clamping for the extension tube, shock absorption and indestructible pitch make it universally applicable. A prism adapter is included, please specify your prism type when ordering.
