

NESTLE GNPS-52 system complete

GPS Surveying so easy - just like that!

Product number :26052001

Topfeatures

- RTK Real-Time Positioning for recording and staking points and geometric shapes
- Import and export of numerous formats (e.g. DXF, KML, CSV, SHP,)

All special features at a glance

- Simultaneous use of 4 satellite systems (GPS, GLONASS, GALILEO, BEIDOU)
- Wireless Connection between Antenna and Field Computer

Description

The NESTLE GNPS-52 is a precise, lightweight, mobile satellite positioning system for point recording and point staking in topography, documentation, construction and volume measurements. Surveying work can be carried out conveniently thanks to the simultaneous use of 4 satellite systems (GPS, GLONASS, GALILEO, BEIDOU) and thus sets a benchmark for satellite positioning systems in the entry-level class. The proprietary and user-friendly NESTLE on2go app enables the user to carry out surveying tasks independently without any specialised knowledge. For more information, please visit the following pages: www.gnps-systeme.com

Further compact information: Info case GNPS-52

Technical Details

Weight (ready for work)	1500 g
Working Height (Antenna)	2 m
GNSS tracking	GPS, Glonass, Beidou, Galileo
Operating temperature	-20°C to +60°C
IP protection class	Antenna IP67, Field Computer IP68
Power supply	Antenna Li-Ion (built-in), Field Computer Li-Ion (replaceable)
Accuracy (RTK Fixed)	1 cm + 1ppm
Battery life	Antenna 10 hours, Field Computer 15 hours
Antenna Channels	1408
Rod	Carbon Rod, telescopic 2m, 20' Bubble Level, Quick Adapter
Field Software	NESTLE on2go permanent (non-transferable)

Scope of supply

GNPS-52 antenna, Height Adapter with 5/8" Internal Thread
