

GeoMax Zenith06 set with Zenius 800

Modern satellite surveying made easy

Product number :26045000

Topfeatures

- 184 channels
- GPS, Glonass, Galileo, Beidou
- Simple RTK rover solution
- Compact and lightweight design

All special features at a glance

- GPS, GLO, BEI, GAL Satellite Tracking
- Unrestricted connection possibilities
- For all German-speaking and European correction data services

Description

You need precise results but don't want to invest in expensive and complicated instruments? GeoMax has the right solution: the new Zenith06 smart antenna with X-PAD field software. With this simple rover and the intuitive field software, reliable results are possible even without long training sessions. The software has an intuitive workflow that was developed together with customers, allowing for quick familiarisation. There are no additional maintenance costs for the X-PAD field software. The compact design and light weight make it easy to measure with the antenna in the field. Zenith06 set with Zenius 800 GeoMax Zenith06 GeoMax Zenius 800 NESTLE GNSS 2-segment carbon rod NESTLE Zenius800 computer holder NESTLE H2C base holder NESTLE GNPS system bag NT-500 The price is available on request.

Technical Details

Weight antenna	approx. 340 g
RTK accuracy	hor = 2 cm + 1 ppm / vert = 3 cm + 1 ppm
Protection class	IP67

Scope of supply

GeoMax Zenith06, GeoMax Zenius 800, NESTLE GNSS 2-segment carbon pole, NESTLE Zenius800 calculator holder, NESTLE H2C base holder, NESTLE GNPS system bag NT-500
