

## GEOMAX Zenius08 Android Tablet

**Improved workflow, in all conditions, all day long**

Product number :29120000

### Topfeatures

- Robust for long and hard days on construction sites
- Control all Geomax GNSS and TPS sensors with X-PAD
- Equipped with the latest Android technology that secures your investment for the future.
- Operation with finger, pen or keys

### All special features at a glance

- Long workdays take you to challenging sites and deadlines don't wait for the weather. With the Zenius08, continue measuring even in harsh conditions thanks to a rugged, waterproof build, robust screen protection, and easy operation.
- A robust, durable design coupled with powerful computing power ensures that the Zenius08 is a long-lasting instrument. Thanks to the latest Android technology, you benefit from system upgrades that secure your investment for the future.
- The long-range Bluetooth connection allows you to move freely around the premises, and the 5G and Wi-Fi connection supports data transfer and video calls with the office.
- The Zenius08 fits into and improves your GeoMax field workflow. Combined with X-PAD field software, it connects to GeoMax GNSS and total station sensors.

### Description

You're committed to getting the job done right and right on time. Make the most of your time on site by viewing and working with your GeoMax TPS and GNSS data on the rugged Zenius08 tablet. The Zenius08 is made for your toughest and longest days in the field, running X-PAD software and synced to all your GeoMax sensors.

### Technical Details
