

NESTLE wall caliper, 60 cm

Simply measure wall thickness

Product number :21102000

Topfeatures

- Enormous labour saving when renovating doors in old buildings.
- Available in two lengths
- Comfortable handling

All special features at a glance

- The caliper slides easily over the measuring rail without jamming, but shows exact measuring results.
- Deep black numerals on silver anodised coating.
- Offset scales on the front and back allow you to measure inside and outside dimensions.
- 30 mm oval profile with a special alloy which guarantees high bending strength.
- The anodised layer prevents abrasion of the deep black numbers and makes the measuring clamp insensitive to building dust and moisture.
- Push handle made of impact-resistant polyamide, the measuring legs are welded of sturdy aluminium.

Description

With the NESTLE wall caliper you can determine the exact wall thickness. This makes them particularly suitable for interior work and renovation work. Especially when renovating doors and windows in old buildings, the wall measuring clamps make the work much easier thanks to their convenient handling. The recesses in the measuring legs allow you to grip around the door lining and measure the wall thickness in seconds. The wall caliper is available in two lengths.
