

leica disto d5

Strong in Outdoor Areas

Product number :16735000

Topfeatures

- Target viewfinder with 4x zoom for perfect aiming
- 360° tilt sensor
- 200 meter range
- for indoor and outdoor use
- Gesture control for triggering the measurement

All special features at a glance

- Various measurement functions, such as Smart Horizontal Mode for measuring over obstacles, height tracking, profile and angle measurements, ensure that any measurement task can be solved.
- The touchless triggering of the measurement by briefly interrupting the laser beam with the hand avoids moving the Leica DISTO™ and guarantees highly precise measurements, especially at small targets or long distances.
- With just a few clicks the measurement result can be sent via Bluetooth from the Leica DISTO™ to the DISTO™ Plan App, for creating and measuring floor plans and sketches.
- The built-in Pointfinder camera ensures that the target can be found in the crosshairs on the crystal clear display with IPS technology, even when the laser point is no longer visible.

Description

The Leica DISTO™ D5 is particularly suitable for distance measurements in outdoor areas. Thanks to the digital Pointfinder, the high functionality and the compatibility with the Leica DISTO™ Plan app, every measuring situation is solved quickly and efficiently. The results can be easily documented to support a target-oriented and error-free digital workflow.

Technical Details

Range/tolerance	0.05 to 200 m ± 1.0 mm
Power supply	rechargeable Li-ion battery
Data interface	Bluetooth ® 5
Weight	180 g
Display	2.4", 320x240 pxs
Dimensions	144 x 60 x 24 mm
Tilt sensor	360° ± 0.2° °
Protection class	IP54
Special feature	Gesture control

Scope of supply

Leica DISTO D5 laser distance meter, Fanny pack, Hand strap, USB cable
