

## NESTLE marking stick 100 cm, wood, with two tips

### The scribing profimeter stick

Product number :20501000

#### Topfeatures

- On cold days, marking meters made of wood are more pleasant to the touch.

#### All special features at a glance

- Version 20501000 with two tips, ideal for determining the length or volume of logs.
- Simple tool for scribing logs.
- The tips are exactly one metre apart.
- The tips and the scribe are made of specially heat-treated tempering steel and are thus protected against rapid dulling.
- As the wooden core is completely plastic-coated, no moisture can penetrate the wood.

#### Description

Simple but very robust marking gauge stick with tips at both ends for marking logs. The profile can withstand even higher loads. The two extra-sturdy galvanised steel hooks are exactly one metre apart, making it almost indestructible. Working with the wooden scribing stick feels more comfortable, and the wooden version is also lighter than models made of metal.
