

NESTLE wooden tripod, heavy duty version, 89-145 cm, MID-I

Flexible use, optimal transport dimensions

Product number :13710000

Topfeatures

- Small transport dimensions
- self-closing
- Small, light and robust
- For highest precision

All special features at a glance

- Particularly suitable for rotating lasers, total stations and laser scanners

Description

The wooden tripod Mid-I corresponds in its specification to the wooden tripods in heavy construction, but with different transport dimensions, different working range and a lower weight. With a transport length of 97 cm, the MID-I is particularly suitable for transport in normal cars, as it can be stored crosswise in almost any car boot. Please note the identically constructed, smaller wooden tripod Mini-I for special applications!
