

NESTLE Clamp holder for theodolite

Quick perpendicular fixation

Product number :13907000

Topfeatures

- Quick and secure fixation of the theodolite plumb above the sectional nail
- No cords swinging in the wind - increase precision when working, especially with long distances or batter boards

Description

With the plank holder, you can easily position a theodolite or rotary laser on a sectional framework. The plank holder is positioned by the guide rails over the axis marking on a sectional framework plank and fixed with the tightening screws.
