All special features at a glance

- Dragonflies: UV-resistant, epoxy-sealed acrylic
- Air-cushioned Ergo-Grip handles
- Shock-absorbing rubber end caps
- Computer optimised profile
- Dual View vials for optimal reading from two directions

Description

Spirit levels are testing devices for horizontal or vertical alignment of an object. The NESTLE professional craftsman's spirit level Zeus, 180 cm has two air-cushioned handles and a rubber cap at each end for shock absorption. The UV-resistant vials are set in epoxy-sealed acrylic. The Dual View™ windows allow the vials to be viewed from two sides. This means you always have an optimal view of the vials and achieve the highest reading accuracy. In addition, this is easy on your back, neck and eyes when reading.
