

LEICA DISTO D110

Handy and precise. Distance measuring device with Bluetooth interface

Product number :16715000

Topfeatures

- Practical shape and unsurpassed ease of use.
- Enhanced functionality with integrated Bluetooth® Smart and the Leica DISTO sketch app.
- Ideal for quick distance and area measurements.
- Technology, quality and precision from Leica Geosystems.

All special features at a glance

- The D110 is the smallest of the Leica DISTO series with integrated Bluetooth® Smart technology.
- Ergonomically shaped, it fits perfectly in the hand.
- With its four buttons, it is quick and intuitive to use and enables distance and area measurements in seconds.
- The latest Leica app DISTO sketch is the ideal link between the D110 and a smartphone or tablet.

Description

Small and handy laser rangefinder with innovative operating concept. In combination with the comprehensive DISTO Sketch app, the D110 becomes a powerful tool for creating plans and measured sketches. The D110 is therefore ideal for quick distance and area measurements and is particularly recommended for carpenters, window fitters, electricians, floor layers, pavers, painters, drywallers or engineers in the construction sector or architects.
