

Angle eyepiece NESTLE DT-200/DT-400 series For use with steep views

Expand your spectrum!

Product number :15902000

Description

For very steep angles up or down with a theodolite, readings at the telescope are often difficult. Use this angle eyepiece for comfortable readings up to the zenith. Suitable for steep angles with Nestle DT-40x, Topcon DT20x, GeoMax Zoom 90, or Leica instruments with bayonet mounts.
