

Marking meter 100 cm, aluminium

The scribing profimeter stick

Product number :20500000

Topfeatures

- Aluminium version is more stable than wooden versions and therefore more durable in daily use.

All special features at a glance

- Simple tool for marking out tree trunks and logs.
- Sturdy hooks made of galvanised steel.
- The tips are exactly one metre apart.
- Oval profile made of aluminium.
- Black cm graduation on both sides under titanium-coloured anodised coating, clearly visible even in twilight.
- The anodised layer prevents abrasion of the numbers and makes the marking stick insensitive to wind and weather.

Description

Simple and very robust marking gauge stick for marking out tree trunks. The oval aluminium profile withstands even higher loads and the extra-sturdy galvanised steel hooks make it almost indestructible. The black cm graduation on both sides under a titanium-coloured anodised coating makes reading easy even in the twilight.
