

GEOMAX GSS111 Barcode lath 5 m for ZDL700

For perfect results with your GEOMAX level

Product number :27023000

Description

This combination levelling staff is the ideal complement for the ZDL700 digital level from GeoMax. With this, highly accurate measurement campaigns with a double levelling standard deviation of 2.0 mm over 1 km are possible. By using the barcode, you can digitally level and determine height differences or uplift and downlift monitoring. The GSS111 barcode telescopic levelling staff is also suitable for use with a conventional levelling device with the classic levelling - E - division or with cm and ensures long and accurate work without abrasion due to the high quality of workmanship.
