

NESTLE scanning sphere with magnetic base Ø145 mm, thread M8

Excellent for precision measurements

Product number :14200000

Topfeatures

- Dishwasher-safe
- Shock-resistant
- Washable

All special features at a glance

- Perfect for assembling and linking multiple scans.
- The spherical shape enables optimal detection from all directions and has proven itself as a laser scanning target.
- The scanning sphere is made of plastic with a special matt textured lacquer for optimum reflection.
- Incl. removable magnetic base (M8 thread).

Description

The excellent properties of the NESTLE scanning sphere predestine it perfectly for use as a laser scanning target. The spherical shape enables optimal detection from all directions. Thanks to the specially matt surface and the impact-resistant plastic, the measuring sphere can be used flexibly for architecture, forensics, construction and monument preservation.

Technical Details

Diameter	145 mm
Accuracy radius	± 0.15 mm at 20 °C
Weight scanning sphere	250 g
Sphericity	0.3 mm at 20 °C

Scope of supply

Scanning sphere, Magnetic base
