

NESTLE boning rods set wood, 2 half and 1 full cross, 1,25m

Traditional levelling method

Product number :21117000

All special features at a glance

- VISOR AIDS COMPLETE IN SET
- Traditional levelling method by sounding.
- Especially for setting curbs, also in curves (due to width of the surface).
- A set consists of two half crosses and one full cross.

Description

With the boning rods you can traditionally level by taking bearings. They are especially suitable for setting kerbs and also in curves due to the width of their surfaces. With the traditional method, you check and transfer heights by taking bearings without having to make calculations.
